Mr. Loeisburg,

I wanted to take a moment to thank you for taking time out of your personal life to speak with me on Saturday.

Because of my growing belief that our government has been losing ground in regards to democratic principles, I've been drawn back to the events of November 1963. In search of the truth I've made the decision and commitment to research & reconstruct the facts of the assassination and our governments failure to resolve it.

After reading far too many books & instantly rejecting the ones with ridiculous theories, I've gone back to the original papers in hope they focus the overall picture.

In addition, this week I'll find the local clippings on Crenshaw for you. I've also called KXAS to get you a video of Mike Snyder's interviews.

I do want you to know that part of what has charted the course is knowing the incredible work you have put together during the previous three decades.

If the failure of democracy is apathy, then only few can claim they keep democracy alive & to me you are one of the few.

Today I've enclosed a few things I've found to date. The most important is Marvin Bubliks report on Oswald's arrest. It seems he is the only one to write a full report on first searching the library in Oak Cliff. You were more in fact "Secret Service" who told the
